Hydroxyl MVP14 Air & Surface Purification System

Product Specifications

Hydroxyl MVP14 Purification System

The MVP14™ is ideal for integration into an existing HVAC system where space is limited and features greater hydroxyl generating capability than the IDI™ treating up to 75,000 sq ft (6,967 sq m) with a single system. The UV optic configuration is customized to produce the hydroxyl generation required to treat the applications. The MVP14 is designed to meet the NEMA 12 rating, is sensor-driven with interactive process controls, and is IoT available through a communication gateway.
